

# Health Care Discrimination Harms Communities of Color in New Jersey

Rapidly escalating medical costs and insurance premiums, rising numbers of people without coverage, and rip-offs by monopolistic private insurers have dominated the New Jersey political dialogue surrounding President Barack Obama's plans for comprehensive health reform. On Capitol Hill, the American public is witnessing an historic clash of Washington special interest groups fighting to protect their revenue streams. Yet no one has more at stake than the 103 million people of color in the U.S.,<sup>1</sup> including the 3,282,000 in New Jersey.<sup>2</sup> Throughout the nation's history, communities of color have been forced to accept health care that bears little resemblance to what is experienced by members of more advantaged groups. For people of color in New Jersey and nationwide, life is shorter, chronic illness more prevalent and

disability more common. These are predictable side-effects of a health care system that provides these communities in New Jersey with narrower opportunities for regular health services, fewer treatment options and lower-quality care.

The infant mortality rate, a leading indicator of community health and well-being, illustrates the huge health disparities between whites and other racial and ethnic groups in New Jersey. The infant death rate for whites is 3.7 per 1,000 live births, compared with 11.9 for African Americans.<sup>3</sup> Life expectancy for African Americans in New Jersey is 6 to 10 years shorter than that of whites.<sup>4</sup> About 40 percent of Latinos and 21 percent of African Americans in New Jersey are uninsured, compared with 11 percent of whites.<sup>5</sup>

## New Jersey Disparities

- In New Jersey, 18.1 percent of African-American adults have been diagnosed with diabetes, more than double the rate for whites.<sup>6</sup>
- Among adult African Americans in New Jersey, 10 percent have asthma, compared to 8.6 percent of whites and 6.7 percent of Latinos.<sup>7</sup>
- In New Jersey, 38 percent of African-American women received no early prenatal care, compared with 24 percent for Latinas and 13 percent for whites.<sup>8</sup>
- The infant mortality rate for African Americans in New Jersey is more than three times that of whites.<sup>9</sup>
- The mortality rate for African Americans in New Jersey is more than 30 percent higher than for whites and more than double the rate for Latinos.<sup>10</sup>
- Despite growing evidence of racial disparities in health status and medical services, no system exists in New Jersey for collecting comprehensive state and local data on disparities. As a result, many questions about the health of minorities in New Jersey remain unanswered. For example, it is not known how many African Americans or Latinos (compared to whites) have forgone care because they can't afford it.
- The U.S. Bureau of Labor Statistics estimates that 8.8 percent of New Jersey's labor force is unemployed.<sup>11</sup>
- In New Jersey 1,344,323 people were uninsured in 2007.<sup>12</sup>
- About 21 percent of African Americans in New Jersey are uninsured, almost double the rate for whites.<sup>13</sup>
- Health insurance premiums for New Jersey working families have skyrocketed, increasing 71 percent from 2000 to 2007.<sup>14</sup>
- The full cost of employer-sponsored health insurance in New Jersey is projected to grow at an annual rate of 7 percent, compared to a 0.7 percent increase in income.<sup>15</sup>
- About 720,000 working non-elderly adults in New Jersey lack health insurance. That comprises 68 percent of the total non-elderly uninsured population.<sup>16</sup>

**New Jersey Racial and Ethnic Disparities by Health Indicator**

Health Indicator	White	African American	Latino	Other
Infant Mortality Rate (deaths per 1,000 live births)	3.7	11.9	5.2	-
Diabetes Mortality Rate (deaths per 100,000 population)	24.6	51.3	-	18.7
Annual AIDS Case Rate (per 100,000 population)	5	69.9	22.5	-
Living in Poverty	8.2%	27%	24%	11%
Enrolled in Medicaid	4.5%	15%	18%	5.7%
Uninsured	11%	21%	40%	14%

Note: - denotes insufficient data in state.
