

Health Insurance Coverage in Alaska Keeps Shrinking As Premiums, Family Costs Continue Climbing

Medical care has become too expensive in Alaska, leaving 115,824 state residents uninsured and exposed to the catastrophic costs of accidents and illnesses.¹ The economic downturn that began 19 months ago has vaporized 7 million jobs across the U.S. and driven the Alaska unemployment rate to 8 percent from 6.3 percent.² More families are finding themselves without health benefits just as the cost of buying coverage on the open market has climbed to record levels.³

While the employed take comfort in holding on to their jobs, thousands of workers at small businesses in Alaska and millions more nationwide remain uninsured because the price of comprehensive health insurance has soared out of reach. And across the nation more than half of Americans whose jobs and benefits are intact nonetheless live in fear of becoming sudden casualties of the worst economic crisis since the Great Depression.⁴ Health insurance premiums have risen so high that experts forecast 52 million Americans will be without coverage next year.⁵ Left alone to purchase coverage directly from private health insurance companies, families often have no choice but to remain uninsured or buy policies with meager benefits.

Alaska Data Points

- Health insurance premiums for Alaska working families have skyrocketed, increasing 74 percent from 2000 to 2007.⁶
- For family health coverage in Alaska during that time, the average annual combined premium for employers and workers with a family of four rose from \$7,456 to \$12,942.⁷
- The combined cost to employers and workers in Alaska of health insurance for a family of four is equal to 21 percent of the state's median family income. Given current trends, that share will grow to 43 percent in 2016.⁸
- The full cost of employer-sponsored health insurance is projected to grow at an annual rate of 7.3 percent, compared to a negative 0.5 percent growth rate for income.⁹
- About 70,000 working non-elderly adults do not have health insurance. That comprises 64 percent of the total non-elderly uninsured population.¹⁰
- In Alaska 7.5 percent of working adults reported spending 20 percent or more of their income on out-of-pocket health care expenses in 2004, a 150 percent increase from three years earlier.¹¹
- For family health coverage in Alaska, the average employer's portion of annual premiums rose 81 percent from 2000 to 2007, while the average worker's share grew by 54 percent.¹²
- During the same time the median earnings of Alaska workers increased 13 percent, from \$27,373 to \$30,931. Health insurance premiums for Alaska working families rose 5.7 times faster than median earnings.¹³
- In Alaska 115,824 people were uninsured in 2007.¹⁴
- The Bureau of Labor Statistics estimates that 8 percent of Alaska's labor force was unemployed in April 2009.¹⁵
- A recent report estimated that 62 percent of bankruptcies were directly related to medical bills; in Alaska there were 810 non-business bankruptcies in 2008.^{16,17}
