

# Health Insurance Coverage in Colorado Keeps Shrinking as Premiums, Family Costs Continue Climbing

**M**edical care has become too expensive in Colorado, leaving 813,188 state residents uninsured and exposed to the catastrophic costs of accidents and illnesses.<sup>1</sup> The economic downturn that began 19 months ago has vaporized 7 million jobs across the U.S. and driven the Colorado unemployment rate to 7.4 percent from 4.1 percent.<sup>2</sup> More families are finding themselves without health benefits just as the cost of buying coverage on the open market has climbed to record levels.<sup>3</sup>

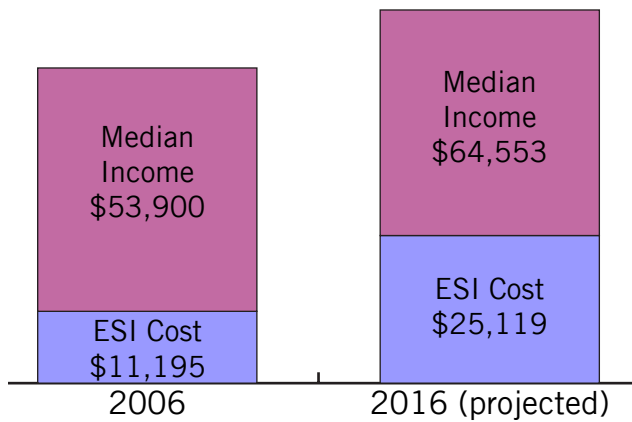

While the employed take comfort in holding on to their jobs, thousands of employees of small businesses in Colorado and millions at small businesses nationwide remain uninsured because the price of comprehensive health insurance has soared out of reach. And across the nation more than half of Americans whose jobs and benefits are intact nonetheless live in fear of becoming sudden casualties of the worst economic crisis since the Great Depression.<sup>4</sup> Health insurance premiums have risen so high that experts forecast 52 million Americans will be without coverage next year.<sup>5</sup> Left alone to purchase coverage directly from private health insurance companies, families often have no choice but to remain uninsured or buy policies with meager benefits.

## Colorado Data Points

- Health insurance premiums for Colorado working families have skyrocketed, increasing 75 percent from 2000 to 2007.<sup>6</sup>
- For family health coverage in Colorado during that time, the average annual combined premium for employers and employees rose from \$6,797 to \$11,878.<sup>7</sup>
- The combined cost to employers and workers of health insurance for a Colorado family of four is equal to 21 percent of the state's median family income. Given current trends, that share will grow to 39 percent in 2016.<sup>8</sup>
- The full cost of employer-sponsored health insurance in Colorado is projected to grow at an annual rate of 8.4 percent, compared to a 1 percent growth rate for income.<sup>9</sup>
- About 450,000 working non-elderly adults do not have health insurance in Colorado. That comprises 71 percent of the total non-elderly uninsured population.<sup>10</sup>
- In Colorado 6.1 percent of working adults reported spending 20 percent or more of income on out-of-pocket health care expenses in 2004, a 110 percent increase from three years earlier.<sup>11</sup>
- For family health coverage in Colorado, the average employer's portion of annual premiums rose 68 percent, while the average worker's share grew by 97 percent from 2000 to 2007.<sup>12</sup>
- In the same time, median earnings of Colorado workers increased 16 percent from \$26,390 to \$30,476, while health insurance premiums for Colorado working families rose 4.8 times faster than median earnings.<sup>13</sup>
- In Colorado 813,188 people were uninsured in 2007.<sup>14</sup>
- The Bureau of Labor Statistics estimates that 7.4 percent of Colorado's labor force was unemployed in April 2009.<sup>15</sup>
- A recent report estimated that 62 percent of bankruptcies were directly related to medical bills; in Colorado there were 20,166 non-business bankruptcies in 2008.<sup>16,17</sup>

### Colorado Premiums vs. Income

Cost of Colorado employer sponsored insurance (ESI) compared to median household income - 2006 and projected 2016 (assuming no meaningful health reforms)
