

# Health Insurance Coverage in Connecticut Keeps Shrinking as Premiums, Family Costs Continue Climbing

**M**edical care has become too expensive in Connecticut, leaving 325,516 state residents uninsured and exposed to the catastrophic costs of accidents and illnesses.<sup>1</sup> The economic downturn that began 19 months ago has vaporized 7 million jobs across the U.S. and driven the Connecticut unemployment rate to 7.9 percent from 4.9 percent.<sup>2</sup> More families are finding themselves without health benefits just as the cost of buying coverage on the open market has climbed to record levels.<sup>3</sup>

While the employed take comfort in holding on to their jobs, thousands of workers at small businesses in Connecticut and millions more nationwide remain uninsured because the price of comprehensive health insurance has soared out of reach. And across the nation more than half of Americans whose jobs and benefits are intact nonetheless live in fear of becoming sudden casualties of the worst economic crisis since the Great Depression.<sup>4</sup> Health insurance premiums have risen so high that experts forecast 52 million Americans will be without coverage next year.<sup>5</sup> Left alone to purchase coverage directly from private health insurance companies, families often have no choice but to remain uninsured or buy policies with meager benefits.

## Connecticut Data Points

- Health insurance premiums for Connecticut working families have skyrocketed, increasing 81 percent from 2000 to 2007.<sup>6</sup>
- For family health coverage in Connecticut during that time, the average annual combined premium for employers and employees rose from \$7,292 to \$13,173.<sup>7</sup>
- The combined cost to employers and workers of health insurance for a family of four is equal to 21 percent of Connecticut's median family income. Given current trends, that share will grow to 34 percent in 2016.<sup>8</sup>
- The full cost of employer-sponsored health insurance is projected to grow at an annual rate of 7.3 percent in Connecticut, compared to a 1.5 percent growth rate for income.<sup>9</sup>
- About 190,000 working non-elderly adults in Connecticut do not have health insurance. That comprises 66 percent of the total non-elderly uninsured population.<sup>10</sup>
- In Connecticut 7.9 percent of working adults reported spending 20 percent or more of their income on out-of-pocket health care expenses in 2004, a 119 percent increase from three years earlier.<sup>11</sup>
- For family health coverage in Connecticut, the average employer's portion of annual premiums rose 75 percent, while the average worker's share grew by 104 percent.<sup>12</sup>
- From 2000 to 2007, wages for Connecticut workers increased 10 percent, from \$32,106 to \$35,281. During that time health insurance premiums for Connecticut working families rose 8.2 times faster than median earnings.<sup>13</sup>
- In Connecticut 325,516 people were uninsured in 2007.<sup>14</sup>
- The Bureau of Labor Statistics estimates that 7.9 percent of Connecticut's labor force was unemployed in April 2009.<sup>15</sup>
- A recent report estimated that 62 percent of bankruptcies were directly related to medical bills; in Connecticut there were 7,826 non-business bankruptcies in 2008.<sup>16,17</sup>
