

Health Insurance Coverage in Idaho Keeps Shrinking as Premiums, Family Costs Continue Climbing

Medical care has become too expensive in Idaho, leaving 217,759 state residents uninsured and exposed to the catastrophic costs of accidents and illnesses.¹ The economic downturn that began 19 months ago has vaporized 7 million jobs across the U.S. and driven the Idaho unemployment rate to 7 percent from 3.6 percent.² More families are finding themselves without health benefits just as the cost of buying coverage on the open market has climbed to record levels.³

While the employed take comfort in holding on to their jobs, thousands of workers at small businesses in Idaho and millions more nationwide remain uninsured because the price of comprehensive health insurance has soared out of reach. And across the nation more than half of Americans whose jobs and benefits are intact nonetheless live in fear of becoming sudden casualties of the worst economic crisis since the Great Depression.⁴ Health insurance premiums have risen so high that experts forecast 52 million Americans will be without coverage next year.⁵ Left alone to purchase coverage directly from private health insurance companies, families often have no choice but to remain uninsured or buy policies with meager benefits.

Idaho Data Points

- Health insurance premiums for Idaho working families have skyrocketed, increasing 122 percent from 2000 to 2007.⁶
- For family health coverage in Idaho from 2000 to 2007, the average annual combined premium for employers and employees rose from \$5,160 to \$11,432.⁷
- The combined cost to employers and workers of health insurance for an Idaho family of four is equal to 23 percent of the state's median family income. Given current trends, that share will grow to 46 percent in 2016.⁸
- The full cost of employer-sponsored health insurance in Idaho is projected to grow at an annual rate of 8.6 percent, compared to an annual income growth rate of 1.1 percent.⁹
- About 120,000 working non-elderly adults in Idaho do not have health insurance. That makes up 72 percent of the total nonelderly uninsured population.¹⁰
- About 6.4 percent of working adults in Idaho reported spending 20 percent or more of their income on out-of-pocket health care expenses in 2004, a 113.3 percent increase from three years earlier.¹¹
- For family health coverage in Idaho, the average employer's portion of annual premiums rose 160 percent, while the average worker's share increased 40 percent.¹²
- Between 2000 and 2007, the median earnings of Idaho workers increased 31 percent, from \$19,004 to \$24,798. During that time health insurance premiums for Idaho working families rose four times faster than median earnings.¹³
- In Idaho 217,759 people were uninsured in 2007.¹⁴
- The Bureau of Labor Statistics estimates that 7 percent of Idaho's labor force was unemployed in April 2009.¹⁵
- A recent report estimated that 62 percent of bankruptcies were directly related to medical bills; in Idaho there were 5,079 non-business bankruptcies in 2008.^{16,17}
