

Health Insurance Coverage in Kansas Keeps Shrinking as Premiums, Family Costs Continue Climbing

Medical care has become too expensive in Kansas, leaving 340,000 state residents uninsured and exposed to the catastrophic costs of accidents and illnesses.¹ The economic downturn that began 19 months ago has vaporized 7 million jobs across the U.S. and driven the Kansas unemployment rate to 6.4 percent from 4.1 percent.² More families are finding themselves without health benefits just as the cost of buying coverage on the open market has climbed to record levels.³

While the employed take comfort in holding on to their jobs, thousands of workers at small businesses in Kansas and millions more nationwide remain uninsured because the price of comprehensive health insurance has soared out of reach. And across the nation more than of Americans whose jobs and benefits are intact nonetheless live in fear of becoming sudden casualties of the worst economic crisis since the Great Depression.⁴ Health insurance premiums have risen so high that experts forecast 52 million Americans will be without coverage next year.⁵ Left alone to purchase coverage directly from private health insurance companies, families often have no choice but to remain uninsured or buy policies with meager benefits.

Kansas Data Points

- Health insurance premiums for Kansas working families have skyrocketed, increasing 88 percent from 2000 to 2007.⁶
- For family health coverage in Kansas during that time, the average annual combined premium for employers and employees rose from \$6,237 to \$11,722.⁷
- The full cost of employer-sponsored insurance in Kansas now equals 25 percent of the median family income. Without meaningful health reform, that number will grow to 48 percent in 2016.⁸
- The full cost of employer-sponsored health insurance in Kansas is projected to grow at an annual rate of 8.2 percent, compared to an annual income growth rate of 0.8 percent.⁹
- About 210,000 working nonelderly adults in Kansas do not have health insurance. That makes up 75 percent of the total nonelderly uninsured population.¹⁰
- In Kansas 6.4 percent of working adults reported spending 20 percent or more of their income on out-of-pocket health care expenses in 2004, a 78 percent increase from three years earlier.¹¹
- For family health coverage in Kansas, the average employer's portion of annual premiums rose 98 percent from 2000 to 2007, while the average worker's share grew by 65 percent.¹²
- Between 2000 and 2007, the median earnings of Kansas workers increased 18 percent, from \$22,351 to \$26,307. During that time health insurance premiums for Kansas working families rose five times faster than median earnings.¹³
- The Kansas uninsured population rose to 340,373 in 2007.¹⁴
- The Bureau of Labor Statistics estimates that 6.4 percent of Kansas' labor force was unemployed in April 2009.¹⁵
- A recent report estimated that 62 percent of bankruptcies were directly related to medical bills; in Kansas there were 8,647 non-business bankruptcies in 2008.^{16,17}
