

# Health Insurance Coverage in Minnesota Keeps Shrinking as Premiums, Family Costs Continue Climbing

**M**edical care has become too expensive in Minnesota, leaving 453,544 state residents uninsured and exposed to the catastrophic costs of accidents and illnesses.<sup>1</sup> The economic downturn that began 19 months ago has vaporized 7 million jobs across the U.S. and driven the Minnesota unemployment rate to 8.1 percent from 4.8 percent.<sup>2</sup> More families are finding themselves without health benefits just as the cost of buying coverage on the open market has climbed to record levels.<sup>3</sup>

While the employed take comfort in holding on to their jobs, thousands of workers at small businesses in Minnesota and millions more nationwide remain uninsured because the price of comprehensive health insurance has soared out of reach. And across the nation more than half of Americans whose jobs and benefits are intact nonetheless live in fear of becoming sudden casualties of the worst economic crisis since the Great Depression.<sup>4</sup> Health insurance premiums have risen so high that experts forecast 52 million Americans will be without coverage next year.<sup>5</sup> Left alone to purchase coverage directly from private health insurance companies, families often have no choice but to remain uninsured or buy policies with meager benefits.

## Minnesota Data Points

- Health insurance premiums for Minnesota working families have skyrocketed, increasing 74 percent from 2000 to 2007.<sup>6</sup>
- For family health coverage in Minnesota during that time, the average annual combined premium for employers and employees rose from \$6,957 to \$12,090.<sup>7</sup>
- The full cost of employer-sponsored insurance in

Minnesota equals 20 percent of the median family income. Without meaningful health reform, that number will grow to 41 percent in 2016.<sup>8</sup>

- The full cost of employer-sponsored health insurance in Minnesota is projected to grow at an annual rate of 8.5 percent, compared to a 0.8 percent growth rate for income.<sup>9</sup>
- About 240,000 working non-elderly adults in Minnesota lack health insurance. That comprises 67 percent of the total non-elderly uninsured population.<sup>10</sup>
- In Minnesota 5 percent of working adults reported spending 20 percent or more of their income on out-of-pocket health care expenses in 2004, a 108 percent increase from three years earlier.<sup>11</sup>
- For family health coverage in Minnesota, the average employer's portion of annual premiums rose 77 percent from 2000 to 2007, while the average worker's share of the cost grew by 66 percent.<sup>12</sup>
- From 2000 to 2007, the median earnings of Minnesota workers increased 17 percent, from \$26,433 to \$30,963. Health insurance premiums for Minnesota working families rose 4.3 times faster than median earnings.<sup>13</sup>
- In Minnesota the uninsured population was 453,544 in 2007.<sup>14</sup>
- The Bureau of Labor Statistics estimates that 8.1 percent of Minnesota's labor force was unemployed in April 2009.<sup>15</sup>
- A recent report estimated that 62 percent of bankruptcies were directly related to medical bills; in Minnesota there were 15,742 non-business bankruptcies in 2008.<sup>16,17</sup>

### Minnesota Premiums vs. Income

Cost of Minnesota employer sponsored insurance (ESI) compared to median household income - 2006 and projected 2016 (assuming no meaningful health reforms)
