

# Health Insurance Coverage in Nevada Keeps Shrinking as Premiums, Family Costs Continue Climbing

**M**edical care has become too expensive in Nevada, leaving 468,808 state residents uninsured and exposed to the catastrophic costs of accidents and illnesses.<sup>1</sup> The economic downturn that began 19 months ago has vaporized 7 million jobs across the U.S. and driven the Nevada unemployment rate to 10.6 percent from 5.2 percent.<sup>2</sup> More families are finding themselves without health benefits just as the cost of buying coverage on the open market has climbed to record levels.<sup>3</sup>

While the employed take comfort in holding on to their jobs, thousands of workers at small businesses in Nevada and millions more nationwide remain uninsured because the price of comprehensive health insurance has soared out of reach. And across the nation more than half of Americans whose jobs and benefits are intact nonetheless live in fear of becoming sudden casualties of the worst economic crisis since the Great Depression.<sup>4</sup> Health insurance premiums have risen so high that experts forecast 52 million Americans will be without coverage next year.<sup>5</sup> Left alone to purchase coverage directly from private health insurance companies, families often have no choice but to remain uninsured or buy policies with meager benefits.

## Nevada Data Points

- Health insurance premiums for Nevada working families have skyrocketed, increasing 55 percent from 2000 to 2007.<sup>6</sup>
- For family health coverage in Nevada during that period, the average annual combined premium for employers and employees rose from \$6,688 to \$10,341.<sup>7</sup>
- The full cost of employer-sponsored insurance now equals 19 percent of median family income in Nevada.
- Without meaningful health reform, that number will grow to 32 percent in 2016.<sup>8</sup>
- The full cost of employer-sponsored health insurance in Nevada is projected to grow at an annual rate of 6.8 percent, compared to a 0.9 percent growth rate for income.<sup>9</sup>
- About 220,000 working non-elderly adults lack health insurance in Nevada. That comprises 65 percent of the total non-elderly uninsured population.<sup>10</sup>
- In Nevada 6.6 percent of working adults reported spending 20 percent or more of their income on out-of-pocket health care expenses in 2004, a 120 percent increase from three years earlier.<sup>11</sup>
- For family health coverage in Nevada, the average employer's portion of annual premiums rose 41 percent, while the average worker's share grew 135 percent.<sup>12</sup>
- From 2000 to 2007, median earnings of Nevada workers increased 21 percent, from \$25,411 to \$30,859. During that time health insurance premiums for Nevada working families rose 2.5 times faster than median earnings.<sup>13</sup>
- In Nevada 468,808 people were uninsured in 2007.<sup>14</sup>
- The Bureau of Labor Statistics estimates that 10.6 percent of Nevada's labor force was unemployed in April 2009.<sup>15</sup>
- A recent report estimated that 62 percent of bankruptcies were directly related to medical bills; in Nevada there were 18,197 non-business bankruptcies in 2008.<sup>16,17</sup>
