

Health Insurance Coverage in Wyoming Keeps Shrinking as Premiums, Family Costs Continue Climbing

Medical care has become too expensive in Wyoming, leaving 72,821 state residents uninsured and exposed to the catastrophic costs of accidents and illnesses.¹ The economic downturn that began 19 months ago has vaporized 7 million jobs across the U.S. and driven the Wyoming unemployment rate to 4.5 percent from 2.9 percent.² More families are finding themselves without health benefits just as the cost of buying coverage on the open market has climbed to record levels.³

While the employed take comfort in holding on to their jobs, thousands of workers at small businesses in Wyoming and millions more nationwide remain uninsured because the price of comprehensive health insurance has soared out of reach. And across the nation more than half of Americans whose jobs and benefits are intact nonetheless live in fear of becoming sudden casualties of the worst economic crisis since the Great Depression.⁴ Health insurance premiums have risen so high that experts forecast 52 million Americans will be without coverage next year.⁵ Left alone to purchase coverage directly from private health insurance companies, families often have no choice but to remain uninsured or buy policies with meager benefits.

Wyoming Data Points

- Health insurance premiums for Wyoming working families have skyrocketed, increasing 129 percent from 2000 to 2007.⁶
- For family health coverage in Wyoming during that time, the average annual combined premium for employers and employees rose from \$5,605 to \$12,824.⁷
- The full cost of employer-sponsored insurance in Wyoming now takes up 26 percent of the median family income. Without meaningful health reform, that number will grow to 47 percent in 2016.⁸
- The full cost of employer-sponsored health insurance in Wyoming is projected to grow at an annual rate of 8.1 percent, compared to a 1.6 percent growth rate for income.⁹
- About 40,000 working non-elderly adults in Wyoming do not have health insurance. That comprises 72 percent of the total nonelderly uninsured population.¹⁰
- In Wyoming 6 percent of working adults reported spending 20 percent or more of their income on out-of-pocket health care expenses in 2004, a 94 percent increase from three years earlier.¹¹
- For family health coverage in Wyoming, the average employer's portion of annual premiums rose 121 percent, while the average worker's share increased 167 percent.¹²
- From 2000 to 2007, the median earnings of Wyoming workers increased 28 percent, from \$20,765 to \$26,561. During that time health insurance premiums for Wyoming working families rose 4.6 times faster than median earnings.¹³
- In Wyoming 72,811 residents were uninsured in 2007.¹⁴
- The Bureau of Labor Statistics estimates that 4.5 percent of Wyoming's labor force was unemployed in April 2009.¹⁵
- A recent report estimated that 62 percent of bankruptcies were directly related to medical bills; in Wyoming there were 785 non-business bankruptcies in 2008.^{16,17}
